00. 基础工具

commander	命令行工具	
inquirer	问答、选项交互工具	
debug	debug工具，命令行和浏览器	
execa	命令执行工具	This package improves `child_process`
globby	文件匹配工具	
memfs	文件 → 内存 工具	In-memory file-system with Node's `fs` API

minimist	命令行参数解析	parse argument options
		`$ node example/parse.js -a beep -b boop`
		`{ _: [], a: 'beep', b: 'boop' }`

rimraf	文件、目录删除工具	The UNIX command `rm -rf` for node.
semver	npm包版本号工具	semver(1) -- The semantic versioner for npm
boxen	终端里画方块工具	Create boxes in the terminal cmd-shim		
deepmerge	对象merge	Merges the enumerable properties of two or more objects deeply.
download-git-repo	git仓库clone工具	Download and extract a git repository (GitHub, GitLab, Bitbucket) from node.
ejs	js模板	Embedded JavaScript templates
envinfo	当前机器环境信息工具	envinfo generates a report of the common details needed when troubleshooting software issues, such as your operating system, binary versions, browsers, installed languages, and more
fs-extra	nodejs中文件操作工具	`fs-extra` adds file system methods that aren't included in the native `fs` module and adds promise support to the `fs` methods. It also uses `graceful-fs` to prevent `EMFILE` errors. It should be a drop in replacement for `fs`.
import-global		
ini	ini文件操作	An ini format parser and serializer for node. Sections are treated as nested objects. Items before the first heading are saved on the object directly.
isbinaryfile	检测是否是二进制可执行文件	Detects if a file is binary in Node.js

js-yaml	js yaml	S-YAML - YAML 1.2 parser / writer for JavaScript
leven		Measure the difference between two strings using the Levenshtein distance algorithm
slash		Convert Windows backslash paths to slash paths: `foo\\bar` `foo/bar`
validate-npm-package-name	npm包名自定义规则校验	Give me a string and I'll tell you if it's a valid `npm` package name.
yaml-front-matter	yaml解析处理	Parses yaml or json at the front of a string. Places the parsed content, plus the rest of the string content, into an object literal.
jscodeshift		jscodeshift is a toolkit for running codemods over multiple JavaScript or TypeScript files.
acorn	js解析	A tiny, fast JavaScript parser, written completely in JavaScript.
acorn-walk		A tiny, fast JavaScript parser, written completely in JavaScript.
address		Get current machine IP, MAC and DNS servers.
browserslist		The config to share target browsers and Node.js versions between different front-end tools. babel、webpack、eslint等
cli-highlight	终端里语法高亮	Syntax highlighting in your terminal
clipboardy	访问系统剪切板	Access the system clipboard (copy/paste)

cliui		easily create complex multi-column command-line-interfaces.
		`Usage: $0 [command] [options]`
		`Options:`
		`-f, --file the file to load.(if this description is long it wraps). [required]`

default-gateway		Obtains the machine's default gateway through exec calls to OS routing interfaces.
dotenv		Dotenv is a zero-dependency module that loads environment variables from a `.env` file into `process.env`. Storing configuration in the environment separate from code is based on The Twelve-Factor App methodology.
dotenv-expand		
portfinder	可用端口查找和配置	
joi	js校验	**The most powerful schema description language and data validator for JavaScript.**
chalk	终端文字颜色 launch-editor	Terminal string styling done right
lru-cache		A cache object that deletes the least-recently-used items.
node-ipc		*a nodejs module for local and remote Inter Process Communication* with full support for Linux, Mac and Windows. It also supports all forms of socket communication from low level unix and windows sockets to UDP and secure TLS and TCP sockets.
open		
ora		Elegant terminal spinner

read-pkg	package.json文件读取解析	Read a package.json file

git-repo-info	当前git工程的git信息	Retrieves repo information without relying on the `git` command.
npm-run-all		A CLI tool to run multiple npm-scripts in parallel or sequential.
open		Open stuff like URLs, files, executables. Cross-platform.
body-parser		Node.js body parsing middleware. Parse incoming request bodies in a middleware before your handlers, available under the `req.body` property.
cacache		cacache is a Node.js library for managing local key and content address caches. It's really fast, really good at concurrency, and it will never give you corrupted data, even if cache files get corrupted or manipulated
chokidar	监听文件变化	Minimal and efficient cross-platform file watching library
@vercel/ncc		Simple CLI for compiling a Node.js module into a single file, together with all its dependencies, gcc-style.
cheerio	nodejs里的jquery实现	Fast, flexible & lean implementation of core jQuery designed specifically for the server.
color		avaScript library for immutable color conversion and manipulation with support for CSS color strings.
compression		Node.js compression middleware. The following compression codings are supported: • deflate • gzip
cross-spawn		A cross platform solution to node's spawn and spawnSync
error-stack-parser	js error的封装	Simple, cross-browser Error parser. This library parses and extracts function names, URLs, line numbers, and column numbers from the given Error's `stack` as an Array of StackFrames.
find-cache-dir	node_modules/.cache的操作	Finds the common standard cache directory
got	nodejs http	Human-friendly and powerful HTTP request library for Node.js
immer	react相关	*Create the next immutable state tree by simply modifying the current tree*
marked		
marked-terminal		> *Custom Renderer for marked allowing for printing Markdown to the Terminal. Supports pretty tables, syntax highlighting for javascript, and overriding all colors and styles.*
merge-stream		Merge (interleave) a bunch of streams.

mkdirp		Like `mkdir -p`, but in Node.js!
multer	用于处理 `multipart/form-data` 类型的表单数据，它主要用于上传文件	Multer is a node.js middleware for handling `multipart/form-data`, which is primarily used for uploading files. It is written on top of busboy for maximum efficiency.
mustache		template system in JavaScript.
native-url	解析url	
np	npm publish	A better `npm publish`
os-locale		Get the system locale Useful for localizing your module or app.
p-limit		Run multiple promise-returning & async functions with limited concurrency
path-to-regexp	路由解析	Turn a path string such as `/user/:name` into a regular expression
pkg-up		Find the closest package.json file
resolve-cwd		Resolve the path of a module like `require.resolve()` but from the current working directory
serialize-javascript		Serialize JavaScript to a *superset* of JSON that includes regular expressions, dates and functions
set-value		Create nested values and any intermediaries using dot notation (`'a.b.c'`) paths
signale	日志工具	**Highly configurable logging utility**
sockjs		
source-map		This is a library to generate and consume the source map format described here.
spdy		With this module you can create HTTP2 / SPDY servers in node.js with natural http module interface and fallback to regular https (for browsers that don't support neither HTTP2, nor SPDY yet).
tapable		The tapable package expose many Hook classes, which can be used to create hooks for plugins.
taskr		Taskr is a highly performant task runner, much like Gulp or Grunt, but written with concurrency in mind. With Taskr, everything is a coroutine, which allows for cascading and composable tasks; but unlike Gulp, it's not limited to the stream metaphor.
yargs	命令行工具	**Yargs be a node.js library fer hearties tryin' ter parse optstrings** **Yargs helps you build interactive command line tools, by parsing arguments and generating an elegant user interface.**

yargs-parser	yargs配套使用，命令行参数解析	The mighty option parser used by yargs.

codecov		Codecov.io support for node.js.
dependency-check	检查依赖的工具	checks which modules you have used in your code and then makes sure they are listed as dependencies in your package.json, or vice-versa
esm	nodejs里es modules的解析器	The brilliantly simple, babel-less, bundle-less ECMAScript module loader.
get-port	又一个可用端口的工具	Get an available TCP port
nodejieba		
nsfw	文件变化监听	A simple file watcher library for node.
pify		Promisify a callback-style function
puppeteer		Puppeteer is a Node library which provides a high-level API to control Chrome or Chromium over the DevTools Protocol. Puppeteer runs headless by default, but can be configured to run full (non-headless) Chrome or Chromium.
simple-git	nodejs里 git 命令等封装	A lightweight interface for running `git` commands in any node.js application.
ts-node	ts文件在node环境里执行	TypeScript execution and REPL for node.js, with source map support. **Works with `typescript@>=2.7`**.

loader-utils	webpack 里 loader 使用的工具方法	Recommended way to retrieve the options of a loader invocation:
		`// inside your loader`
		`const options = loaderUtils.getOptions(this);`

camelcase	lodash也有方法也能干这个	Convert a dash/dot/underscore/space separated string to camelCase or PascalCase: `foo-bar` → `fooBar`
mkcert	https使用?	Create self signed tls certificates without OpenSSL
query-string	url参数解析	Parse and stringify URL query strings
detect-port	又一个找端口的	Node.js implementation of port detector
inspector-dom	chrome dev tool	Pure vanilla-js ultra-lightweight dom inspector similiar to built-in tool in chrome browser with a custom callback
find-root	返回文件的根目录	recursively find the closest package.json
url-parse	又一个解析url的	The `url-parse` method exposes two different API interfaces. The `url` interface that you know from Node.js and the new `URL` interface that is available in the latest browsers.
parseurl		Parse a URL with memoization.
loglevel	日志	Minimal lightweight simple logging for JavaScript. loglevel replaces console.log() and friends with level-based logging and filtering, with none of console's downsides.
prerender-spa-plugin		*Flexible, framework-agnostic static site generation for sites and SPAs built with webpack*
tinycolor2		JavaScript color tooling
file-type		Detect the file type of a Buffer/Uint8Array/ArrayBuffer

npmlog		The logger util that npm uses. This logger is very basic. It does the logging for npm. It supports custom levels and colored output.
request-progress		Tracks the download progress of a request made with request, giving insight of various metrics including progress percentage, download speed and time remaining.
conventional-changelog		
jscpd		Copy/paste detector for programming source code, supports 150+ formats.

@microsoft/api-extractor	TS	**API Extractor** helps you build better TypeScript library packages.
cross-env	跨平台环境变量	Run scripts that set and use environment variables across platforms
node-fetch	window.fetch	A light-weight module that brings Fetch API to Node.js.
playwright-chromium	nodejs环境调用浏览器内核加载页面，保存截图等，供end2end测试	Playwright is a Node.js library to automate Chromium, Firefox and WebKit with a single API. Playwright is built to enable cross-browser web automation that is **ever-green**, **capable**, **reliable** and **fast**.
sirv		An optimized middleware & CLI application for serving static files~!
kolorist	又是一个搞颜色的	Tiny library to put colors into stdin/stdout
@babel/standalone		Standalone build of Babel for use in non-Node.js environments
systemjs		SystemJS is a hookable, standards-based module loader. acorn
acorn	AST	A tiny, fast JavaScript parser, written completely in JavaScript.
brotli-size		Get the brotli compressed size of a string or buffer.
builtin-modules		List of the Node.js builtin modules
cac	这又一个cli工具	**C**ommand **A**nd **C**onquer is a JavaScript library for building CLI apps.
connect		Connect is an extensible HTTP server framework for node using "plugins" known as *middleware* .
convert-source-map		Converts a source-map from/to different formats and allows adding/changing properties
cors		CORS is a node.js package for providing a Connect/Express middleware that can be used to enable CORS with various options.
es-module-lexer		A JS module syntax lexer used in es-module-shims.
estree-walker		Simple utility for walking an ESTree-compliant AST, such as one generated by acorn.
etag		Create simple HTTP ETags This module generates HTTP ETags (as defined in RFC 7232) for use in HTTP responses.
fast-glob		It's a very fast and efficient glob library for Node.js.
http-proxy		`node-http-proxy` is an HTTP programmable proxying library that supports websockets. It is suitable for implementing components such as reverse proxies and load balancers.

minimatch	匹配工具	A minimal matching utility.
		`var minimatch = require("minimatch")`
		`minimatch("bar.foo", "*.foo") // true!`

okie		Dead simple worker threads pool.
open-in-editor	操作编辑器的	NPM package to open a file in editor.
periscopic		Utility for analyzing scopes belonging to an ESTree-compliant AST.
selfsigned	生成证书	Generate a self signed x509 certificate from node.js.
tslib		This is a runtime library for TypeScript that contains all of the TypeScript helper functions.
ws		ws: a Node.js WebSocket library
